ADOPTED

The Governing Board *desires to provide a comprehensive career technical education (CTE) program in the secondary grades which integrates core academic instruction with technical and occupational instruction in order to increase student achievement, graduation rates, and readiness for postsecondary education and employment. The District's CTE program shall be designed to help students develop the academic, career, and technical skills needed to succeed in a knowledge and skills-based economy. The program shall include a rigorous academic component and provide students with practical experience and understanding of all aspects of an industry.*

*The District's CTE program shall focus on preparing students to enter current or emerging high-skill, high-wage, and/or high-demand occupations. CTE opportunities may be offered through linked learning programs, partnership academies, apprenticeship programs or orientation to apprenticeships, regional occupational centers or programs (ROC/Ps), charter schools, small learning communities, magnet programs, or other programs that expose students to career options while preparing them for future careers in a given industry or interest area.*

~~affirms the importance of providing all students with quality vocational education experiences that teach life skills, demonstrate the value of work, and provide training that leads to entry-level employment. The Board views vocational education and academic education as complementary educational programs. Vocational courses should give students abundant opportunities to obtain or reinforce basic academic skills. Teachers should emphasize as often as possible the practical applications of academics to the working world.~~

~~The Board recognizes that vocational education is best presented in a well-articulated sequence of courses, with instruction first given in broad clusters of skills basic to similar occupations. A comprehensive vocational education includes research into various employment options, vocational counseling, establishment of career goals, and the development of job skills, good work attitudes, and job hunting strategies.~~

~~Because the equipment used in business and industry changes rapidly, as do the skills needed to operate it, the Board especially desires that the District's vocational education program be updated regularly to reflect current vocational practices, changes in technology, and labor-market conditions.~~
