He presented two potential scenarios based on 2020 Census data (total population counts). He said only minimal adjustments are needed in each scenario. Scenario 1 includes slight adjustments to trustee areas 2, 3, and 5, and results in the most balanced population option. Scenario 2 includes two minimal changes (between areas 2 and 3 and between areas 4 and 5). The maximum variance is higher in scenario 2, but is still below the 10 percent variance allowed. He reviewed additional data for each scenario including race and voting age population. The two options will be presented for a vote at the January 19, 2022, Governing Board meeting. There were no public comments. Dr. Moore closed the public hearing. A copy of the presentation is attached to the agenda of this meeting.
