

## **Addendum to 2021-22 SPSA for Placerita Junior High School**

**Approved by SSC on 03/08/2022**

**Submitted for Board approval on 04/13/2022**

### **1. Goal 3.1 Increase funds:** Transportation to and from field trips for 8th graders.

Placerita would like to increase the funding needed to cover the cost of transportation for 8th grade field trips. This will allow students to experience a world outside of their own neighborhood and community. School field trips increase students' critical thinking skills as they retain more factual information from what they experience and see in person. Field trips allow students to connect what they are learning in the classroom with real life, making learning come alive.

**Funding source:** Funds to be reallocated from Goal 3.2 Transportation field trips for 7th graders. Reallocation details shown below.

FROM			Amount	REALLOCATED TO	
Goal 3.2	OBJ 5710	Transportation- 7th grade field trips	\$10,000.00	Goal 3.1 Transportation - 8th grade field trips	OBJ 5710
Total:			\$10,000.00		

### **2. Goal 4.8      New Strategy: Professional Development      \$6,120.00**

Provide staff training opportunities to build leadership capacity, build positive relationships between students and staff members, and create self-managing classrooms which will affect school-wide culture and improve student achievement.

After reviewing school-wide data for discipline referrals, suspension rates, and bias motivated acts, evidence shows a need to focus on improving the consistency of our school wide policies with all staff. By training staff through the design of our school wide policies we will create a more cohesive atmosphere throughout the campus. A foundational framework for assessment would also be included to demonstrate equity in grading procedures for students. Also by training staff, we will create a great equity of process for all students in all classrooms. Because many veteran teachers who were formerly trained annually in the past have retired or moved, there is a need for new teachers, administrators, and counselors to go through the design and training for school-wide support and implementation.
